Broda Seating, May 2009

Why Broda chairs are the ideal choice for hospice care:

Comfort and Pain Management:

Broda chairs are known for their comfort which is provided by our patented Comfort Tension Seating™:

- Contours to the resident's body for support and long term sitting comfort. Reduces the risk of "bottoming out."
- Redistributes pressure helping to prevent skin breakdown.
- Space between straps creates air flow, helping to reduce heat and moisture build up that can lead to skin breakdown. Offers increased comfort.
- Memory retention allows strapping to return to its original shape within seconds which makes it great for multiple users.

Broda Comfort Tension Seating™

Comfort and Pain Management (continued):

- Broda chairs offer infinitely adjustable tilt and recline to help reduce pressure and increase overall seating comfort. Infinite adjustability means various positioning options and ease of repositioning to **maintain comfort**.
- Seat tilt creates a cradle effect which is **excellent for resting**.
- Seat tilt and back recline help **improve resident's posture, leading to better comfort**.
- Adjustable footrest/legrest, armrests and wings (upper laterals) create support for the resident, for **improved sitting**.
- Overall improved comfort helps resident **maintain pain management**.

Midline Tilt Recliner

Quality of Life:

- Broda chairs have a front pivot seat tilt, which means the resident maintains a consistent eye level at any tilt angle. This **helps encourage socializing- excellent for time with family.**
- Infinitely adjustable tilt and recline allows patients to get out of bed, thus improving their **quality of life and dignity.**
- Broda mobility chairs- Pedal Chair and Pedal Rocker encourage independence and mobility contributing to improved **quality of life.**
- Broda models 785 and Midline offer a full recline, which is **excellent for napping, and comfort.**

Pedal Rocker in 18° of tilt

785 Tilt Recliner

Resident Safety

- Broda chairs offer a front pivot tilt in space which lowers the resident's center of gravity. This helps to **prevent falls and is exceptionally stable.**
- Tilt and recline help **keep residents comfortable** which helps reduce slumping, sliding, and potential for residents to get out of chair.
- Adjustable length legrest with footplate accommodates various residents and **offers support** to help prevent falls.
- User friendly features make it easy for caregivers to provide the **best care and compassion for residents.**

785 with seat mounted arms (Arms tilt with seat)

Durability

- Broda chairs are the ideal choice for hospice as they offer superior durability. The frame is made of 16 gauge tubular steel. Durability means **residents feel safe and comfortable.**
- Less maintenance and repairs are needed with Broda chairs which means less “down time” with the chair. Residents will be able to continue to **receive the best quality of care.**
- **Family members feel best** when their loved ones have the **highest quality seating.**
